PROJECT in Current Company (January 2019 to now)

Shriaunsh:

This website is developed to promote the Shriaunsh Group business. They have two businesses - Solar, DNV Group etc.

Fusion AC:

This website is about their AC product. It contains the whole information about their company and their products and clients.

Client Links :

www.tragsqatar.com

www.excellenceshelters.com

Home production websites: (Company websites)

Elcontechserve:

This is our company's main website. It is all about the work we do and our clients.

Elcon:

This is our main company. There are many websites to develop. Just started developing them one by one.

PROJECT in Previous Company(XDBS, Kharadi, Pune) (February 2017 to January 2019)

EDM Management Tool:

This is a small tool which is useful to know current status of Campaigns. Client Code, Campaign List, API or EDM List, Report of all API's or EDM's is generated in Excel, etc. are the small modules. If Campaigns are pending, changes are required or it's completed. We can add Client codes(and their respective managers), Campaigns, assets and edm links, API's , etc.

PROJECT in Previous Company (Prime Web Media, Koregaon Park, Pune) (September 2016 to January 2017)

I was previously working as a PHP developer with Prime Web Media Company. I have developed php project for my company.

Project Name: www.myindianstores.com

Responsibilities: Developed start to end project.

Overview: Here is all the Indian stores listing all over the world. We can search stores by country, state, city wise. There are different categories of stores. Also, User/Store Owner can post blogs, testimonials, events. And also, we can check the weather of particular city and detailed weather report news with video.

PROJECT in BE Computer Engineering

Structures and Links for analysis of Improving User Navigation Sessions. (Final Year Project) 2015

- **Software's are used:** Net Beans IDE 7.1, JDK 1.7

- **Description:** We have created a dummy website and we have minimized the longest path using Data

Mining algorithm. Our project has two main modules- Client and Server. Client side is our website's home page. On this home page, as user clicks on the link, respective page will get opened and session

id, page index, hit count get displayed. On Server side the Database is stored. The main function of

minimizing the path using Data mining algorithm is performed on this Server side. We are using Serialization to store Database.

PROJECT in Diploma Computer Engineering

Placement Management System (Diploma) 2011

- **Front End:** VB 1.6
- **Back End:** MS Access
- **Description:** We have collected students' data and according to their percentage, students are categorized into company list. As per company's criteria students will be allowed to apply in companies. Our project has the database of students' data and also data of companies. We have used MS Access for database.

HOBBIES

Travelling, Swimming , Listening music.

PERSONAL SKILL

Good team leading ability, good verbal, written and communication skills.

STRENGTHS

- I believe in sincerity & dedication in the execution of the work given.
- Good team player with positive approach.
- Learns new things quickly and adapt to new environment easily.
